Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Arguments

Applicant's arguments with respect to claims 17 and 18 are have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 17, 18 and 24 are rejected under 35 U.S.C. 102(e) as being anticipated by Seliger [US 6,668,667].

Claim 17, Seliger discloses a method of operation of a temperature- independent microscopic switch, comprising: actuating [3, in directions 31, 31', 31''] a micromechanical beam [34]; and limiting movement of the beam with a tether [5] attached to the beam at a point different than an attachment point for an anchor [figure 1].

Claim 18, Seliger discloses the method of Claim 17, wherein limiting movement of the beam comprises limiting movement of a cantilevered beam [figure 1].

Art Unit: 2832

Claim 24, Seliger discloses a cantilever MEMS switch [figure 1] comprising a tether [5] having at least two ends, wherein a first end of the tether is at least coupled to a substrate [1, via 6 and 12], and wherein, a second end of the tether is at least coupled to the a cantilever arm [342, figure 1].

Allowable Subject Matter

Claims 1-6 and 38 are allowed.

Claims 25-30 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: Claim 1, the prior art of record does not teach nor suggest, in the claimed combination, a temperature independent microscopic switch with a conductive beam suspended from an anchor to a substrate, and at least one tether, with on end attached to a fixed location and the other end attached to the conductive beam away from the anchor.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bernard Rojas whose telephone number is (571) 272-1998. The examiner can normally be reached on M and W-F, 5:30-3:00.
